## Chemical Properties

CAS	486-86-2
Formula	C <sub>12</sub> H <sub>16</sub> N <sub>2</sub> O
MW	204.27
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The chemical structure of Caulophylline is a complex bicyclic system. It features a benzene ring fused to a six-membered ring containing a nitrogen atom. This six-membered ring is further fused to a five-membered ring, which also contains a nitrogen atom substituted with a methyl group (CH<sub>3</sub>). A carbonyl group (C=O) is attached to the benzene ring.</p>
Purity	>98%, Standard References Grade
