## Chemical Properties

CAS	2034-69-7
Formula	C <sub>19</sub> H <sub>12</sub> O <sub>6</sub>
MW	336.29
Storage	4°C for 1 year, -20°C for more than 2 years
Structure	 <p>The chemical structure of Daphnoretin is a dimeric flavonoid. It consists of two flavanone units linked by a biaryl ether bond at the 7-position of one of the flavanone rings. The left flavanone ring has a hydroxyl group at the 5-position and a methoxy group at the 3-position. The right flavanone ring has a carbonyl group at the 4-position.</p>
Purity	>98%, Standard References Grade
