Chemical Properties

| | |
|-----------|---|
| CAS | |
| Formula | C ₄₆ H ₉₁ N ₃ O ₆ S ₆ |
| MW | 974.6 |
| Storage | -20 |
| Structure |  The chemical structure shows a central nitrogen atom bonded to a methyl group and three other groups. One group is a propyl chain ending in a primary amine group (-NH ₂). The other two groups are propyl chains, each ending in a disulfide group (-S-S-) which is further connected to a long alkyl chain (approximately 10 carbons). |
